Mr Dinh Tran Ngoc Huy is an experienced researcher with about 300 publications in good domestic and international journals including WoS ISI, Scopus, etc.

Dear valuable scholars, colleagues and respected researchers,

We are glad to invite you to submit a research paper for our Special Issue of ***Management Systems in Production Engineering*** titled “Management Theories, Practices and Perspectives in Production Value Chain Across Various Industries”.

With this journal special issue, we expect to receive your theoretical or research papers relating to management excellence (in theory and practice) and its perspectives in production or manufacturing value chain in developing countries (including Vietnam, Asian Pacific, Middle East, Latin America and Africa, etc.) as well as developed markets (Europe, US, Japan, etc.). The business world has been affected by industry 4.0 and further, Covid 19, China-US commerce war, so it is the time to handle these effects and manage better companies with technology efficiency and tools to reduce errors and wastes.

We aim to connect business research papers relating to theories and practices in management excellence applying in production value chain across various industries. Our target audience will consist of graduate and last year undergraduate students, researchers, scholars, businessmen and women, academicians in universities and colleges, and esp. engineers around the world

Related topics addressed by this Special Issue include, but is not limited to:

1. Total Quality management (TQM) in production
2. ISO standards applying in production (manufacturing)
3. Enhancing values for production value chain
4. R&D activities in production
5. Relationship between other functions (sale, marketing strategy, business strategy, customer service, financial management, management accounting, technology, IT...) and production
6. Relationship between leadership and production, manufacturing

7. Impacts of other business functions (marketing, customer service, sale, finance, IT operation, etc.) on risk management
8. Examples of Business Models and relation to production models
9. Risk analysis in production value chain
10. Relationship between economic values and production activities
11. Management, economic value added, and manufacturing excellence or production engineering
12. Technology innovation management in production
13. Operational risk management
14. Other relating topics

Types of paper submitted: research papers, conceptual papers, theoretical papers, empirical papers, case studies, reviews

Submission details

All submissions must be made via electronic submission system

www.stegroup.pl/mspe/MSPEEN/MSPEFormEN.php

All manuscripts must adhere to the MSPE submission and peer review rules and will go through the usual MSPE review process. Instructions for authors are available at

https://content.sciendo.com/supplemental/journals/mspe/mspe-overview.xml/Instructions_for_Authors.pdf

Article Processing Charge: All articles published in Management Systems in Production Engineering (p-ISSN 2299-0461, e-ISSN 2450-5781) are published in full open access. Authors are asked to pay an article processing charge (APC) of 200 EUR (+ 23% VAT) per accepted paper.

The APC only applies if the paper is accepted for publication after double-blind review and possible revision of the manuscript. There are no submission charges.

Open Access License: This journal provides immediate open access to its content under the [Creative Commons BY 4.0 license](https://creativecommons.org/licenses/by/4.0/). Authors who publish with this journal retain all copyrights and agree to the terms of the above-mentioned CC BY 4.0 license.

Deadline for manuscript submission: 30 Sep 2021.
